

A scatter plot showing the relationship between 'Weight' (x-axis) and an unlabeled variable (y-axis). The x-axis ranges from 0.0 to 0.6 with major ticks at 0.0, 0.2, 0.4, and 0.6. The y-axis has four unlabeled tick marks. A horizontal purple line is drawn at the second tick mark from the bottom, representing a value of 0.5. Data points are represented by black circles, triangles, and squares. Most points are clustered at low 'Weight' values (below 0.1), with a few points extending to a 'Weight' of approximately 0.62. The points are scattered both above and below the horizontal line.

A scatter plot showing the relationship between 'Weight' (x-axis) and an unlabeled y-axis. The x-axis ranges from 0.0 to 0.6 with major ticks at 0.0, 0.2, 0.4, and 0.6. The y-axis has five unlabeled tick marks. Data points are represented by circles, squares, and triangles. A horizontal red line is drawn across the plot at the second tick mark from the bottom.
